

Ottawa, Week by Week

Conversations With President

"The conversations I had with the President of the United States covered a fairly wide range of subjects and were, of course, private and confidential," said Prime Minister St. Laurent in the House of Commons, when he was asked by an M.P. if he dealt with the matter of the wheat agreement with Britain and ECA support.

"I cannot give any specific information at this time as to the views or conclusions which may have been reached in regard to the matters discussed," he continued. "I can say, however, that the President indicated a friendly understanding of the Canadian position in regard to wheat exports. I do not think I should go beyond that without making special leave from the President, which he must give."

Implications of Figures

The leader of the official opposition, Hon. George Drew, has said in the House of Commons that the federal government is not in the policies of the federal government during recent years. He pointed out that the federal government has increased the taxes collected by the authorities in Ottawa. He has emphasized that whereas in the year 1941 the federal government collected \$1,468 million to the federal government, \$1,472 million to provincial governments and \$274 million to municipal governments, yet in 1947, or the last year for which complete figures are available, \$2,420 million went to the federal government, \$398 million to the provincial governments and \$346 million to municipal governments.

In other words, Mr. Drew charges that in 1948 the federal government obtained 61.9 per cent of the taxes; provincial governments, 18.8 per cent; and municipal authorities, 20 per cent. But in the last fiscal year, 1947, the federal government derived 76.7 per cent, the provincial governments 12.5 per cent, and municipal governments 10.8 per cent. These figures, he claims, prove the great centralization of power in Ottawa.

Bright Colors

The Board of Transport Commissioners here has had under consideration for some time now a proposal for the use of distinctive colors for diesel operated trains. "In fact, some discussions are being held at the present time, but no decision has been reached," said a spokesman for the Canadian government, giving this information when asked what is being done about the fast-moving diesel trains in view of the danger to motorists.

Flour and Chemical

The Food and Drugs Division of the Department of National Health and Welfare sent a representative to hear testimony in Washington, at which the use of nitrogen trichloride in flour was investigated. Through their investigation it was determined that nitrogen trichloride is harmful to humans in the amount present in white flour. In this country, it is being sold to the supplier at once by some animal experiments, regulations of the Food and Drugs Act are being revised to prohibit the use of nitrogen trichloride in flour sold in Canada, says a spokesman here.

Many Farm Products

"I repeat that there are not many farm products that can be sold outside this country at present prices that can be obtained in the country at the present time," said Agricultural Minister "Red" in the House of Commons. He said that the price of farm products in the United States market today is a better price than it is getting for them in the Canadian market, very few. Mr. Gardiner declared bluntly in emphasizing his point,

Random Notes

A novel experiment in the agricultural field has been called off because of too much publicity. An engineering student at the University of Michigan had undertaken to try to eat out a four-month-old hog. Both were to weigh in at 165 pounds, and the student hoped to match pound for pound of food with the hog until the animal called it quits.

The hog was to eat ground oats, corn and wheat, with some down with milk and water, while the student was to have eaten from a regular breakfast menu for the first hour, and then switch to more sustaining foods such as steaks, potatoes and vegetables. What purpose behind the proposed experiment was not stated in the news item, nor for how long the contest was figured to last. This kind of hog business can be overdone, as some feeders have learned to their sorrow; yet the time required to starve perfectly healthy hog or for that matter an engineering student—that has not been scientifically worked out as far as is known. It seems unfortunate.

According to the generally accepted rules under such circumstances, the smart young British under-Secretary of State, Christopher Greenwood, is shortly due to be kicked upstairs, following his trash answer, while on a visit to the United States. In Britain had practically recovered her economic position, thereby causing quite a flurry of excitement in the circles of the Atlantic. Some members of the finance committee of the Senate began discussing the possibility of the nine hundred million dollars about to be allocated to Britain under the European Recovery Plan was now needed. This country picked Sir Stafford Cripps, but Paul Hoffman stepped in, and all's quiet on the Western front.

The only likely casualty will be the Under-Secretary.

Evidence is accumulating that in George Drew, the Progressive Conservative has acquired a leader that has been lacking since the death of R. B. Bennett. It is probable, also, that among those most keenly appreciative of the fact that the Progressive government in Ottawa today. The Newfoundland debate program, the opportunity for Mr. Drew to air provincial rights which he was quick to exploit, while at his press conference here, he took time to dwell on the electroneering value to the Liberals of the 20 cents advance on the price of wheat, which the government announced last week.

and clearing up a situation which has been mentioned considerably recently. This is the only country that Canadian farm products could be sold in large quantities across the border at higher prices than they are being obtained elsewhere.

Age of Voters

H. R. Angus, M.P. for Wood Buffalo, has introduced a bill in the House of Commons to amend the Dominion Elections Act, so that the eligible age of voters could be reduced from 21 to 18.

Costs Levelling Off

Construction costs in Canada would be "levelled off" by the end of this year, according to a forecast here by R. G. Johnson, general manager of the Canadian construction association. He said that the cost of building materials and a much larger skilled labor force. Indeed, he said, the construction industry was slowly feeling the effects of training given to veterans at DVA-approved vocational training schools.

Say you saw it in The Delia Times

Vocalist

DOROTHY AIT, whose songstress in the Certain Time broadcasts on Wednesdays at 7:30 p.m. on the CBC Winnipeg radio Network, Sioux has her first singing engagement at the age of four in her home town—Fleur Court, Manitoba—Miss. Ait has become one of Canada's best-known vocalists. For two years she was with Peter Falk, and she has also appeared in such programs as Latin American Serenade and Canadian Caravans. Also in the credits are a stint of movie-making for the National Film Board, several years as mistress of ceremonies in a International Hotel, and a Buffalo broadcast series as well as stage, radio and television appearances in England.

Obituary

Jacob P. Morlock

We regret the death of J. P. Morlock, widely known farmer of the Majestic district, which occurred suddenly on Saturday last, February 28th. Mr. Morlock was struck down while actually engaged in work around his place.

Deceased, who was 63 years of age, was born in Neudorf, Russia, and accompanied his parents on their emigration to the United States. He came to Alberta in 1908. First at Oida, and in 1911 he resided until his death. He farmed extensively, and was one of the earliest settlers to engage in thrashing operations with the old steam outfit.

Surviving to mourn his loss is his widow; and five sons, Henry, William, of Brymore; Ernest, Edgar and Benny, of the Delia district; also two daughters, Mrs. K. Almaruth, of Brymore, and Pearl, now residing at Misericordia Hospital, Edmonton, Alberta.

William Billings

William Billings, old-timer of this district, died in Drumheller hospital on Wednesday last, February 23rd, following a long illness. He was 74 years of age.

Funeral services

Funeral services will be held at St. Andrew's Church on Saturday, March 4th, at 2 p.m.

INTERMENT took place in Delia cemetery.

Winter's Funeral Home had charge of arrangements.

SUGGEST RETAIN TARIFF RESTRICTIONS

Before the United States Senate Finance Committee, a stockman from Denver, Colorado, stated that more than a million head of cattle had died recently in the United States, and that the country just at a time of the most drastic decline in the prices of cattle that have ever occurred. He suggested that President Truman should immediately place a limit on imports from Canada and the Argentine, the Senate was requested to retain restrictions on the presidential power to cut tariffs, which were imposed by the last Congress.

Fire destroys property each year

SEEDTIME HARVEST

By Dr. F. J. DEANEY
Lecturer from British Columbia

Germination Tests Are Important

The purpose of this report is to emphasize the importance of germination tests. The Home Elevator Farm Service has just completed germination tests on 170 samples of wheat, corn, barley and clover seed from all over Manitoba, Saskatchewan and Alberta. The results, showing the percentage of seed which will grow, which the germination was below 71 per cent, say given in the accompanying table.

Percentage of Samples
Crops Manitoba, Sask. Alberta
Wheat 50.0 52.0 50.0
Barley 0.0 0.0 0.0
Oats 1.0 1.0 1.0
Rye 3.8 1.3 2.0
Clover 10.0 10.0 10.0
Alfalfa 4.0 4.0 4.0
Timothy 1.0 1.0 1.0
Hay 1.0 1.0 1.0
Corn 1.0 1.0 1.0
Soybeans 1.0 1.0 1.0
Potatoes 1.0 1.0 1.0
Cattle 1.0 1.0 1.0
Hogs 1.0 1.0 1.0
Poultry 1.0 1.0 1.0
Dairy 1.0 1.0 1.0
Fruit 1.0 1.0 1.0
Vegetables 1.0 1.0 1.0
Miscellaneous 1.0 1.0 1.0

Farmers in the northern districts of the West and the north-west must be well advised to have their seed tested for germination before they plant it. In fact, it will be necessary to test seed for germination before they plant it. In fact, it will be necessary to test seed for germination before they plant it.

Many farmers are taking advantage of the fact that the Home Elevator Farm Service has just completed germination tests on 170 samples of wheat, corn, barley and clover seed from all over Manitoba, Saskatchewan and Alberta. The results, showing the percentage of seed which will grow, which the germination was below 71 per cent, say given in the accompanying table.

Special Low Rail Fares For Calgary Spring Stock Show

Special railway fares will be in effect for the Calgary Annual Spring Stock Show, which is being held at 18th, according to R. H. Powers, Vice-Chairman of the Canadian Passenger Association.

Special railway fares will be in effect for the Calgary Annual Spring Stock Show, which is being held at 18th, according to R. H. Powers, Vice-Chairman of the Canadian Passenger Association.

Special railway fares will be in effect for the Calgary Annual Spring Stock Show, which is being held at 18th, according to R. H. Powers, Vice-Chairman of the Canadian Passenger Association.

Time Treatment of Floor Litter For Chickens

During the winter, especially when the temperature changes rapidly, considerable difficulty is experienced in maintaining dry litter in many of the winter houses. W. T. Davis, of the Poultry Commission, advises that satisfactory results have been obtained by the use of a number of cases of the use of hydrated lime to condition the floor litter.

If adequate ventilation has been provided and the litter is still damp, the following treatment is recommended instead of removing the litter.

Spread 12 to 15 pounds of hydrated lime for each 1000 square feet of floor space. This should be done every two weeks. This over will with one or two inches of fresh litter. Repeat the process in 2 or 4 weeks or whenever necessary.

It is very important that all litter be stirred at least twice each week. The litter around the water troughs and in front of the windows should be replaced with litter from a drier part of the house as soon as it starts to become damp. The litter should be kept dry. The litter should be kept dry. The litter should be kept dry.

About 70 per cent of Canadian houses are wired for electricity

ACQUITTED OF MURDER—Acquitted on charge of murdering "Cowboy Parker," a racing stable groom, Vincent St. Lawrence, 34, of Toronto, race-track groom, is seen with his mother at his home. He was released after 2½ months in jail waiting for his trial. "I knew you were innocent," said his mother, Parker had been hanged to death just after he had won a stable bet at race-track that same day.—S.N.S. photo.

BELIEVED TO BE RECORD—Two girls and two boys in three days less than 15 months were born to Mrs. Allan Frier of Windsor, Ont., a British war bride shown here with family. From left, back are: Patricia and Veronica, two, with mother, Robert and Roger, both aged nine months. This is believed to be a record.—S.N.S. photo.

ENTHUSIASTIC SKIERS—Weather conditions across most of Canada are ideal for ski enthusiasts, and activity in this sport at present is at its peak as many compete in championship competitions. The above are four student nurses, Cecilia Barrera, Columbia; Doris Armstrong, Toronto; Irma Olvati, Chile, and Sami Iowamola, Japanese-Canadian, were among the thousands who were at Huntsville, Ont., to attend the Ontario championship. Visitors voted skiing "wonderful"—S.N.S. photo.

OPINIONS DIFFER ON VITAMIN E—When two London doctors claimed three years ago that Vitamin E was valuable in the treatment of heart disease they started a controversy that time has not settled. While the controversy continues, the work of the Biltz Institute in London, Ontario, where heart diseases are treated by Vitamin E goes on. Here are Dr. Ewan and Dr. Wilfred Shute, both of whom say they gave up lucrative practices to carry on the program of the institute.—S.N.S. photo.

RARE TYPE BLOOD SAVES WOMAN'S LIFE—A relay team of provincial police pulled two pieces of a rare type blood from the Royal Victoria Hospital blood bank in London, Ont., to the Canadian in London, the Mrs. A. F. Nicholas of Detroit, Mich. The effort made the 48 miles in one hour and 15 minutes. The emergency trip was necessary because of the rare type of Mrs. Nicholas' blood. The call for it was made by Dr. L. G. Payne as Mrs. Nicholas was about to give birth to a baby.—S.N.S. photo.

TURNS DOWN \$8,000 FOR GREAT DANCE—One of the top-ranking show dancers in North America, Fergan's Champion Duchess, will be at the Westminster dog show in Madison Square Garden, New York, this month. Her owner recently turned down \$8,000 for her and four of her puppers have brought \$2,000 "cheques" is shown here with Betty Cuyler.—S.N.S. photo.

WHITE RUSSIANS FLEE SHANGHAI—Fleeing in face of Chinese Communist advances, White Russians in Shanghai board the S.S. Hwa Lien for an escape trip to a refugee camp set up on Hainan Island. The government has set up a provisional capital in Canton and has rushed 15,000 men there from Shanghai to bolster defenses. Shipment of gold, silver bullion from Shanghai was stopped.—S.N.S. photo.

CONVALESCING—Variation in Sun Jiao, and recuperating from a recent kidney operation, former Secretary of State George C. Marshall is shown with Mrs. Marshall beside the cottage where they are staying. This photograph was made at General Marshall's first interview since arriving Jan. 15. He told newsmen that he has gained considerable weight and feels good, giving hope credit for the speedy convalescence to the delightful climate of the island.—S.N.S. photo.

SCDENSELY INHERITS MILLIONS—Windfall inheritance of an eighth share of a \$20,000,000 estate brings happy smiles to Mr. and Mrs. David M. Teller of Cornwall, Ont. The estate was left by a childhood friend, Charles Teller, of Wellington, N.Z., who died intestate in 1927.

THIEVES GET \$6,000—Mildred Gm, photographer of county over-seer's office in Niagara, Ont., stands by the sale in the county office which were listed of \$6,000 in bonds by thieves who broke in overnight. The lot was won from the vault in the office of Sheriff J. L. Haywood. This safe before open contained only stamps and papers.—S.N.S. photo.

PRIME MINISTER AND WIFE—Recent picture of Prime Minister and Mrs. St. Laurent as they moved through a crowd to attend mass at Sacred Heart church at Wolland, Ont.—S.N.S. photo.

M. H. Half and daughter, Theresa, visited in Edmonton a few days during the week end.

Henry G. Schafer, who has been engaged during the winter in construction work at Banff, returned to his home recently.

On Saturday afternoon, Miss Linda Lewellen was hostess to nine little friends and their mothers on her Golden Birthday. A most enjoyable time was had by all.

A check of the files of "The Delia Times" reveals that in the time last year the district had suffered the worst blizzard and the deepest drifts in its history. Friday, February 27th, was the day of the blizzard and was followed by a heavy snow on Tuesday, March 2nd, which tied up all road and rail traffic. The present mild weather, which has been enjoyed for the past few days, which is making rapid progress in the disposal of snow, is in marked contrast to these experiences.

Sunbeam News
Mr. and Mrs. Eugene Rutherford and family, from Drumheller, were guests at the home of Mr. and Mrs. George Cosens on Sunday.

Mr. Skahan, teacher of Starland School, underwent an operation for appendicitis in the Drumheller hospital last week.

Mr. Harold Bruce and little son Bruce, from Kelsey, arrived last Tuesday to visit with Mr. and Mrs. Arthur Stiffes.

Mr. John Hunter and daughter, Elaine, and their passengers to Acme Monday evening, where they will visit her daughter Mr. Bill Wayne, and Mr. Wayne.

Mrs. Harold Trentham returned from Calgary on Tuesday evening, having spent the last three weeks visiting in the city.

Danny Smith from Hanna, was a visitor at the home of Mrs. Dick on Wednesday.

Boy Barker returned to his home at Freemont, Sask., via Rowley, last Wednesday.

Mr. and Mrs. Thos. Huddleston are visiting at the home of Mr. and Mrs. Sam Vivian in Drumheller.

Mr. and Mrs. Fred Holland, accompanied by their niece, Miss Margaret Holland, R. N., visited their home in Delia on Monday. Bert Holland is a patient in the University hospital in Edmonton.

Mr. and Mrs. Alex. Dick, and daughter Carol, were guests at the Watters home on Monday.

Harold Nelson has a crow that has stayed in his yard around the buildings all winter and with the poultry. This crow had an injured wing fall and was left behind.

Feb. 28 "biddy" brought out a family of 10 baby chicks.

Card of Thanks

We wish to thank many friends and neighbors for their floral tributes received, during our recent and bereavement in the death of our Father.

The Billings Family.

Conference Hits Snags

The Argentina has quit the International World Conference. Another problem presented to the Conference is that, France has notified the United States that it will not send a wheat export country in the form of an export country.

Joe Cramer, provincial approved senator, was at work in the village last week.

Mrs. Chester Thompson, who has been suffering from erysipelas, is believed to be improving.

Percy Klinek visited his mother, Mrs. A. Klinek, who is a patient in Drumheller hospital, on Sunday last.

Never too Early to Mend

Leathridge Experimental Station
Weekly Letter.

When referring to machinery, that old saying about its being "never too late to mend" needs to be changed. It is surprising how little time marks up on one, or buying time, or harvest for that matter.

Spare parts for machinery sometimes are not immediately available from the local agent, and although he will do his best to get them sent from the branch warehouses in the last possible time, there may be a delay of a day or more. A day during the busy season means a loss of time and money.

At the Experimental Station, the men in the shop, having finished overhauling tractors, are now line checking over all the other farm machinery. They begin with those implements which will be in use first in the spring.

It is not enough to rely entirely upon machinery when it comes to finding what repairs have to be made. Each machine must be thoroughly examined and checked, as chances are that the bearings used in the last season may have worn from one to the other. The wheels are taken off and checked, as chances are that the bearings used in the last season may have worn from one to the other.

What about the power line? Was it fused properly when used last fall? Does power not do too much for the line? If they are not used, nor if they are not done. Promote on drills sometimes about their line and side along the way.

Spring is not last for fear. There are some on almost every machine, even on much important looking implements as lawn mowers. Both spring has a job to do. If one is broken, or has been lost, replacement is necessary. Springs are to be found everywhere and in all sizes from the big counter-springs on one-way discs and mowers to the little ones in green vipers.

Green vipers are very important tools. They provide the means by which a machine can be lubricated. Green is cheaper than kerosene.

But it is not enough to examine only the working parts of the machine. Without a framework to hold them in place the working parts would be useless. Frames are subject to considerable vibration and strain and may have cracks in them. Some sometimes work loose and bolts are lost. The loss of a bolt may lead to the breakage of one of the other parts of the machine.

Plow shares and cultivator shovels should not be overlooked. After a few dry fall they will all need sharpening. The backhills are not to be overlooked. After a few dry fall they will all need sharpening. The backhills are not to be overlooked. After a few dry fall they will all need sharpening.

Canada has eleven lakes exceeding 1,000 miles in area.

It is never too early to mend.

RADIO

The following are among the high lights of programs to be heard over CIBC stations on Thursday, Friday, Saturday and Sunday, March 8, 9, 10, and 11, all times mentioned are Mountain Standard Time.

Bread Not Fattening

Bread is not an important source of fat in the national diet, according to a report of the Nutritionists, Dr. G. J. Cutler, of the Massachusetts General Hospital. This statement may help disprove the fallacy of the diet and bread products to which has been attributed much of the declining consumption of flour and bakery products.

Canada has eleven lakes exceeding 1,000 miles in area.

MARVELUBE HELPS YOU KEEP DOWN TILLAGE COSTS

Here's why...

The old lubricating oil in your tractor engine contains dirt which increases engine drag, promotes wear, and may result in clogged oil filters, thus causing injury to cylinders and bearings.

Building with the correct grade of Marvelube for your tractor is good business because:

1. Free flowing Marvelube effectively lubricates moving parts for all farm operations.

2. Marvelube resists heat—does not break down under continuous operation, but protects against wear under dry, day-out work.

3. Marvelube does further protection by retaining the formation of carbon and reducing sludge in the crankcase.

Translated into cash benefits for you, the above simply means that frequent servicing with Marvelube lubricants gives your tractor the extra power and smoothness which speeds up all tractor-powered operations on your farm.

Marvelube helps cut down operating costs, aids in avoiding unnecessary replacement of parts, and keeps your tractor on the job longer.

THE WORLD OF WHEAT

By H. G. L. Strang

Population versus Food

People throughout the world are now vigorously discussing the subject of population versus food. Some contend that population is growing faster than foodstuffs. Others claim, however, that great supplies of unwanted foodstuffs are even with us today. In view of all this it is interesting to note the recent statements by officials of the World Food and Agricultural Organization, which recently met in conference at Washington. The Director General, Mr. N. E. Doid, said that in 1948 crops have dried the edge of the crisis. It is true, but there is a serious danger ahead. North America and we cannot rest upon expectation of continued exceptional crops in one region. There is only 910 so much food per capita as before the war, and only 3/4 as much food per capita is moving in international trade. Viewed in the light of Malaya, Australia, and the Chairman of the P. A. O. Council, said that "We do not live in a static world. Population is increasing every day. All peoples are seeking improved levels of living." Then the Conference made this statement:

LOW FARES to Annual Sprink

From all stations in Alberta.

ONE WAY FARE AND ONE-HALF FOR ROUND TRIP

TICKETS ON SALE MARCH 12 to 17

And on March 18 for arriving Calgary not later than March 19.

RETURN LIMIT, MARCH 19

If not taken before March 19, fare first available.

CANADIAN NATIONAL

Again
RED CROSS
appeals to you... and you
...and you

This year the Red Cross Must have More Money

More call for Red Cross
More Outpost Hospitals
More Blood Donor Services
More Red Cross Aid Veterans

Throughout Canada, 75 Outpost Hospitals and 2 Crispill Children's Hospitals must be kept open. Millions of dollars have been spent in food, fuel, and other necessities, in saving the stricken and homeless.

Province by Province the Red Cross is opening its Free Blood Transfusion Service. Until now have been saved by this great organization. But more funds are needed to expand and maintain this humanitarian work.

Red Cross provides many services for veterans in Hospitals. Other Red Cross activities include Junior Red Cross Swimming and Water Safety, Nursing Service, First Aid, and Women's Work.

And each year 18 for arriving Calgary not later than March 19, fare first available.

Your RED CROSS money is backed up by thousands of volunteer workers

THE RED CROSS NEEDS 5 MILLION DOLLARS - 40% MORE THIS YEAR!
